PRICES ON LARGER PLANTS FURNISHED ON REQUEST

# SPECIMEN PLANTS

These plants are *uniform, globe-shaped*, slow-grown in heavy clay soil; the foliage is very dense and the balls are solid, insuring safe transplanting.

All plants listed herein are at least *twenty years old* and are exceptionally hardy, having been exposed in the field to the heat of summer, as well as the winter winds, and when planted where they receive partial shade and protection, develop and grow very quickly.

*Do not make the mistake of purchasing quick-grown, forced plants by height alone*, as spread and density of foliage are the attractive features of Boxwood and constitute its value.

If interested in height alone, write for prices on this cheaper stock.
